# partners IN RECOVERY

Darling Downs & South West QLD

### What to expect from PIR

This program aims to promote ease of access through a central enquiry desk where initial eligibility will be determined. If the participant meets eligibility criteria, the referral will be sent through to the Support Facilitator in the participant's area.

If the individual is not suitable for PIR, the Regional Coordinator will connect the individual to other community connection points that may be able to assist them.

Once connection has commenced, the Support Facilitator will arrange a mutual time to complete the initial assessment and develop an action plan around the participant's needs. The Support Facilitator will continue to work alongside the participant until the action plan is completed.

The Support Facilitator will also play a role in identifying system gaps and challenges, and collaborate with other consortium partners to identify areas of system reform as we work towards finding solutions.
